ASTRONAUTS HAVE..

THE ASTRONAUTS HAVE...

Astronauts have a rocket.

Astronauts have a spacesuit.

Astronauts have a helmet.

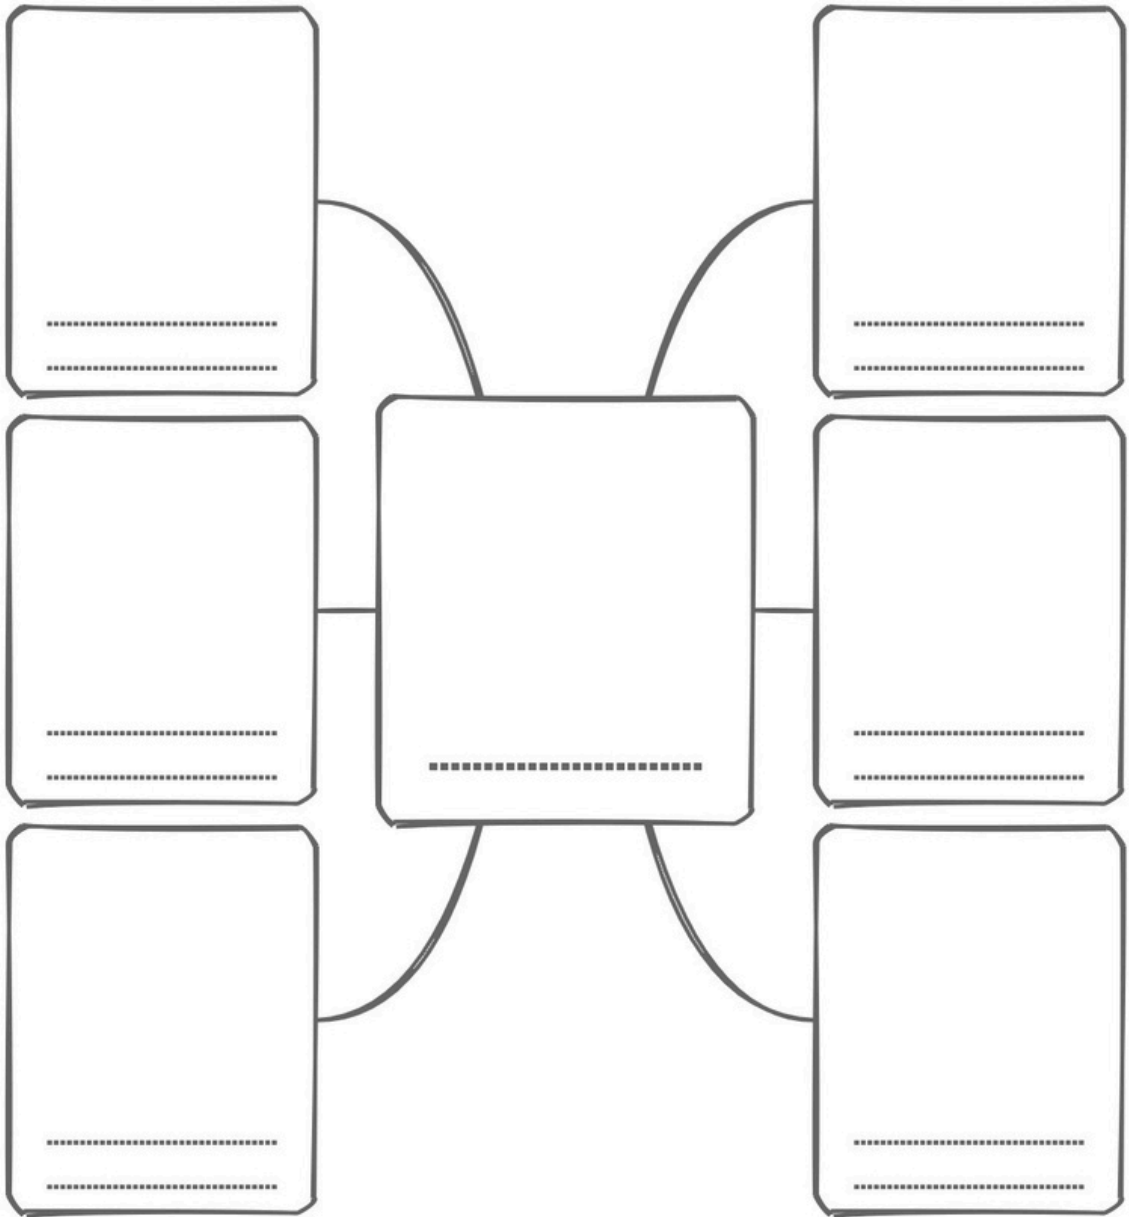

Astronauts have gloves.

Astronauts have boots.

Astronauts have oxygen.

The Sun is a huge star, not a planet.

It is at the centre of the Solar System.

It is a giant ball of very hot, burning gas.

The Sun is much bigger than all the planets together.

It gives the Earth its light and heat.

The Sun is too hot and dangerous for us to visit.
